EC2 > Instances > Launch an instance

It seems like you may be new to launching instances in EC2. Take a walkthrough to learn about EC2, how to launch instances and about best practices

Do not show me this message again

Take a walkthrough

Launch an instance

Amazon EC2 allows you to create virtual machines, or instances, that run on the AWS Cloud. Quickly get started by following the simple steps below.

Name and tags

Search results

Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

▼ Configure storage Info Advanced

1x 10 GiB gp2 Root volume, Not encrypted

Free tier eligible customers can get up to 30 GB of EBS General Purpose (SSD) or Magnetic storage

Add new volume

The selected AMI contains more instance store volumes than the instance allows. Only the first 0 instance store volumes from the AMI will be accessible from the instance

Click refresh to view backup information

The tags that you assign determine whether the instance will be backed up by any Data Lifecycle Manager policies.

Do not close your browser while your instance is being launched

Launching instance

Subscribing to Marketplace AMI

73%

This is taking longer than expected. Subscription usually takes less than 30 seconds but in rare cases AMI subscription can take up to an hour.

To ensure that your instance is launched you need to keep your browser open during this time.

You can continue working in the EC2 console while you wait by opening up the [EC2 console in a new browser tab](#)

Details

Please wait while we launch your instance.

Do not close your browser while this is loading.
